Woodside Carbon Sequestration Site and Substation, BLM 2012a; Interstate Loop Road, BLM 2012a; The Narrows Dam and Reservoir Project, SWCD 2012b; Energy Gateway West Transmission Line, Tetra Tech 2013; TransWest Express Transmission Line, AECOM 2013; Strawberry Highlands Proposed Commercial, Wausatch County 2012; Simple Land Divisions, Mesa County 2011; Green River Industrial Site, SFTLA 2013; Long Canyon Coal Lease, BLM 2012a; Flat Canyon Coal Lease, USFS 2012c; Continental Divide-Croton Junction Oil and Gas Project, BLM 2007g; Blacktail Ridge Exploratory Drill Project, URMCC 2013c; Proposed Oil and Gas Units, BLM 2012a; Roschud Mine, Anbar Energy 2012b; Strawberry Highlands Proposed Parks, Recreation and Residential Subdivision, Wausatch County 2012; Moss North Pumped Storage Project, BLM 2013a; Victory Pipeline, Jones and DeMille Engineering 2012; Potential Wind Development Area, Energy County 2011; Hogback Ridge Wind Energy Project, BLM 2013b; Public Land Survey System, BLM 2011; Contours generated by EPG, USGS NED 1 arc-second data 1999; Series Compensation Station Siting Area, Rocky Mountain Power 2013; City or Town, ESRI 2010; Transmission Lines and Substations as digitized by EPG, POWERmap Plans 2009; Crown Substation Boundary as digitized by EPG, Rocky Mountain Power 2013; Moss Substation Boundary as digitized by EPG, Bing 2013; National Transportation Atlas Database, USDOT 2008; Link Highways and Roads, AGRC 2012; Pipeline, PowerWall MAPSearch 2011; Water Features, ESRI 2008, USGS 2010a; State and County Boundaries, ESRI 2008; Land Jurisdiction, BLM 2009, 2010, USFS 2006

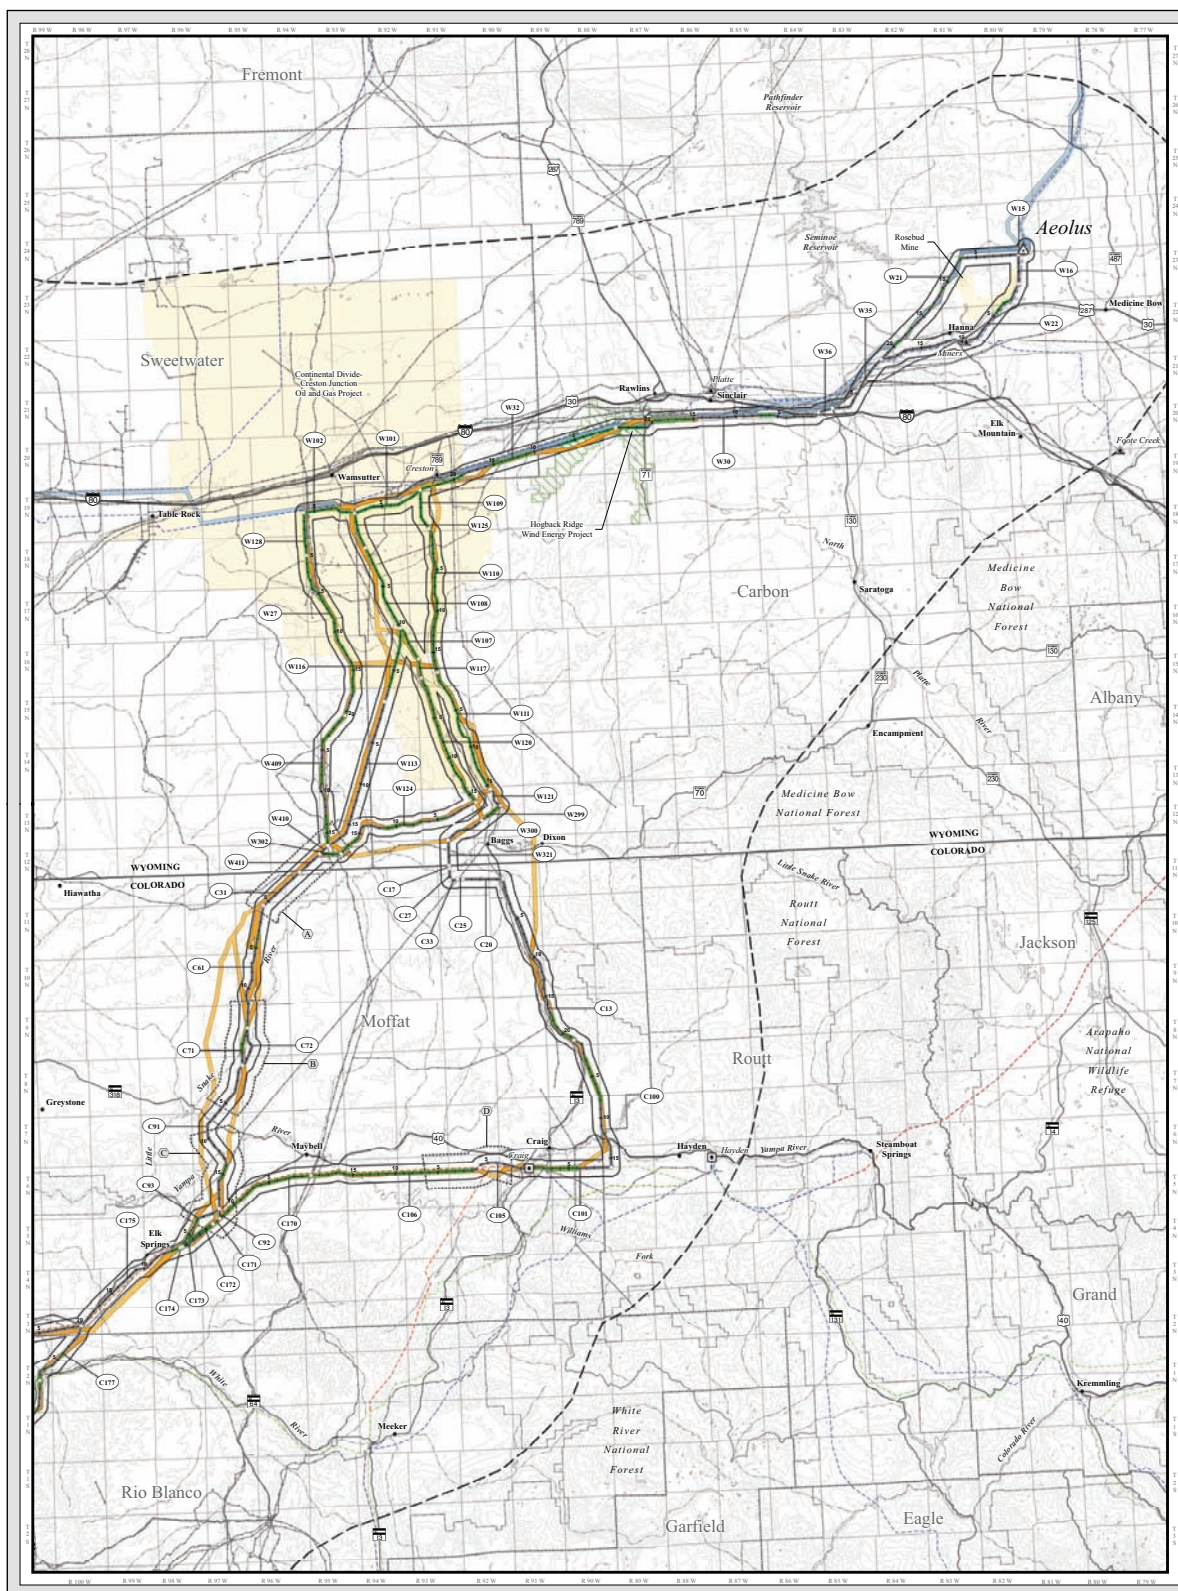

### Notes:

- <sup>1</sup> Only proposed activities that intersect the 2-mile-wide land use study corridor are shown and labeled on this map, and these are shown within the Project area boundary. Uses that have been authorized or approved are not displayed on this map, as construction for these projects may currently be underway or could begin at any time.
- <sup>2</sup> The alternative routes and series compensation station siting areas shown on this map are draft and may be revised and/or refined throughout the development of the Project.
- <sup>3</sup> Substation symbols do not necessarily represent precise locations.
- <sup>4</sup> Contour interval: 150 meters

Scale in Miles  
0 5 10  
1:380,160 or 1 inch = 6 miles

DRAFT EIS

### Resource Inventory

#### PROPOSED ACTIVITIES<sup>1</sup>

- Proposed Substation
- Proposed Road
- Proposed Narrows Dam and Reservoir Project
- Proposed Trail
- Proposed Energy Gateway West Transmission Line
- Proposed TransWest Express Transmission Line
- Proposed Commercial
- Proposed Industrial
- Proposed Parks and/or Preservation
- Proposed Recreation
- Proposed Residential
- Proposed Utility
- Proposed Wind Farm

### Inventory Key

#### Impact Levels

- High
- Moderate
- Low
- No Identifiable

#### Project Features

- Project Area Boundary
- Substation (Project Terminal)
- Series Compensation Station Siting Area
- General Reference

#### General Reference

- City or Town
- Substation
- Power Plant
- 500kV Transmission Line
- 345kV Transmission Line
- 230kV Transmission Line
- 138kV Transmission Line
- Railroad
- Pipeline
- Interstate Highway
- U.S. Highway
- State Highway
- Lake or Reservoir
- River or Stream
- State Boundary
- County Boundary
- Jurisdictional Boundary

### Impact Key

#### Impact Levels

- High
- Moderate
- Low
- No Identifiable

### Notes:

Only proposed activities that intersect the 2-mile-wide lead use study corridor are shown and labeled on this map, and these are shown within the Project area boundary. Users that have been authorized or approved are not depicted on this map, as construction for these projects may currently be underway or could begin at any time. The alternative routes and series compensation station siting areas shown on this map are draft and may be revised and/or refined throughout the development of the Project. Substation symbols do not necessarily represent precise location. Contour interval: 150 meters.
